DETAILED ACTION

1. This action is responsive to communications: the application filed on 11/19/03, foreign priority 11/28/02.
2. Claims 1-12 are pending in the case. Claims 1 and 8 are independent claims.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding independent claim 1, it seems improper that distinguishing is performed *on the contents that are inputted* since according to figure 1, the inputted data includes the contents and the contents information that are distinguished by the content distinction section.

Art Unit: 2178

Also, it is confusing what the claimed limitation means within "that is an attribute information related to the contents contained in the contents" (lines 9-11).

Dependent claims 2-7 are rejected for fully incorporating the deficiencies of their base claim.

Also, it is confusing whether claims 1-7 are method claims or system claims.

Independent claim 1 and its dependent claims 2-7 are directed to an information conversion control *method*. However, most of the claimed limitations, which are the functional sections, seem to be units of a system rather than steps of a process.

Therefore, if these claims remain method claims, the claimed limitations should be amended to recite the steps of a process. Otherwise, it is suggested that claims 1-7 be amended to be system claims with functional sections.

6. Regarding claim 2, the phrase "such as" (line 9) renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

7. Regarding independent claim 8, as mentioned in claim 1 above, it seems improper that distinguishing is performed *on the contents that are inputted* since according to figure 1, the inputted data includes the contents and the contents information that are distinguished by the content distinction section.

8. Dependent claims 9-12 are rejected for fully incorporating the deficiencies of their base claim.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art of record is listed on PTO 892.
